EPD COMMERCE

BRAND GUIDELINES / V3 / 2026-11-02

Brand guidelines.

How EPD Commerce looks, sounds, and talks about payments, processing options, and features.

SOURCE OF TRUTH: GITHUB.COM/EASYPAYDIRECT/EPD-COMMERCE-BRAND

POWERED BY EASY PAY DIRECT. EPD COMMERCE IS A DBA OF EASY PAY DIRECT LLC.

CONTENTS

What's inside.

01	Brand at a glance	What EPD Commerce is, the messaging hierarchy, lines, trust anchors
02	Logo system	Lockups, files, clearspace, misuse
03	Capabilities	Create, Analyze, React, Transact
04	Processing options	Process Now, Easy Pay Direct, payment methods
05	Color and buttons	Surfaces, dark panels, gradients, buttons, shadows
06	Typography	Website components and social graphic sizes
07	Voice and copy	How we sound, do and don't, names
08	Features	Release status and approved feature copy
09	Making graphics	Templates, backgrounds, and the composite rule

The repo is the source of truth. This PDF is generated from `github.com/EasyPayDirect/epd-commerce-brand`. Names live in `data/names.json`, numbers in `data/claims.json`, and approved copy in `messaging-kit/`. If two sources disagree, the data files win.

SECTION 01

Brand at a glance.

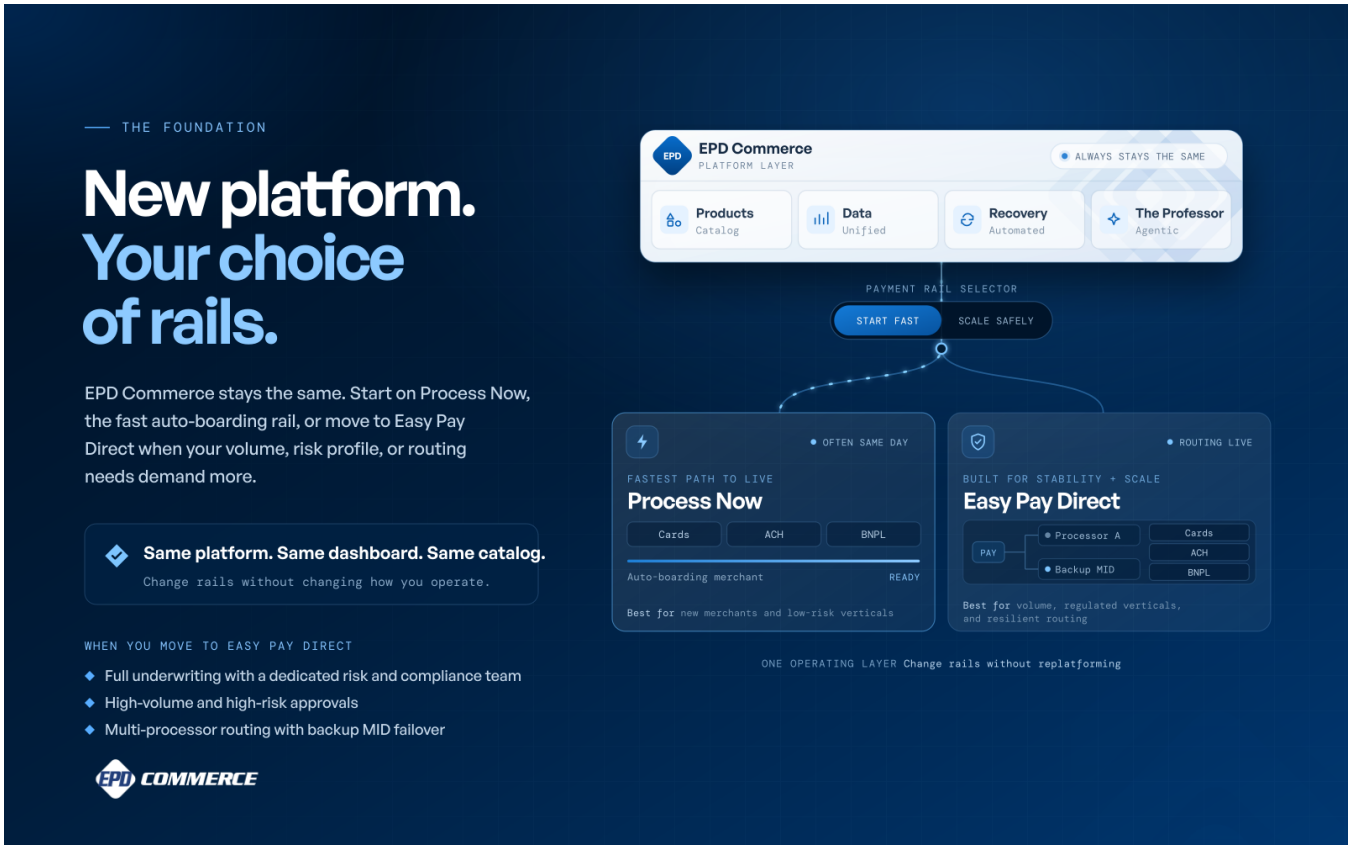

What EPD Commerce is, how to lead, and the lines and numbers you can use.

BRAND AT A GLANCE

What EPD Commerce is.

EPD Commerce helps businesses accept payments, then gives them the tools to sell, recover, and understand their revenue on top of those payments.

Powered by Easy Pay Direct. EPD Commerce is a DBA of Easy Pay Direct LLC.

assets/diagrams/foundation-section.png, the foundation section on epd.com.

BRAND AT A GLANCE

Messaging hierarchy.

Lead with payments. Build up from there. Every piece of content follows this order, even if it only covers one level.

01

Accept payments.

Take payments on your existing website, connected carts, checkouts, and payment links. Buyers pay how they want.

02

Two processing options.

Process Now for a fast start, or Easy Pay Direct for full underwriting and white-glove service. Same platform. Same dashboard. Same catalog.

03

Tools built on top.

Revenue Recovery, The Professor, AI Product Landing Pages, Custom Fields, and the rest, organized by capability: Create, Analyze, React, Transact.

AI and agentic commerce are part of level 3, not the headline, unless the audience is specifically AI-focused.

Lines

PRIMARY LINE (HOMEPAGE HERO)

Built to accept payments from humans and agents.

FOR AI-FOCUSED AUDIENCES ONLY / AGENTIC COMMERCE CONTENT, AI PARTNERS, DEVELOPER AUDIENCES

- Most AI helps you write faster. EPD Commerce helps you run better.
- Agentic inside and out.

SUPPORTING LINES / APPROVED ANYWHERE

- Same platform. Same dashboard. Same catalog.
- Change rails without changing how you operate.
- Most platforms tell you a payment failed. EPD Commerce does something about it.

BRAND AT A GLANCE

Two brands. One team.

EPD Commerce and Easy Pay Direct are separate brands.

- **EPD Commerce** is the commerce platform.
- **Easy Pay Direct** is the payment processor behind it, and also the name of the fully underwritten processing option.

The same team runs both, and "EPD" on its own is the umbrella for both brands, for example "the EPD ecosystem" or "the EPD team." Never use "EPD" as shorthand when you specifically mean Easy Pay Direct, the processor or the processing option.

	EPD COMMERCE	EASY PAY DIRECT
Role	The commerce platform. Products, checkout, subscriptions, reporting, recovery, and agentic commerce.	The payment processor and parent company. Also the name of the fully underwritten processing option inside EPD Commerce.
Never write	EPD commerce, Epd Commerce, EPDC (in customer-facing copy), epd-commerce	EPD (as shorthand for Easy Pay Direct), EasyPay Direct, Easy Pay

Trust anchors

Easy Pay Direct track record, always attributed to Easy Pay Direct.

13+	Billions	100k+	$48M+
YEARS PROCESSING	PROCESSED	BUSINESSES HELPED	REVENUE RECOVERED

Always attributed to Easy Pay Direct. Never shown as EPD Commerce numbers.

BRAND AT A GLANCE

Every claim and its status.

Use approved claims only, with their attribution and soft words. Pending and retired claims never appear in public copy.

CLAIM	ATTRIBUTION	STATUS
13+ years processing	Easy Pay Direct	Approved
Billions processed	Easy Pay Direct	Approved
100k+ businesses helped	Easy Pay Direct	Approved
$48M+ revenue recovered	Easy Pay Direct	Approved
Approval is often same day	Process Now	Approved
Same day, often within an hour	Process Now	Approved
Typically 1 to 3 days	Easy Pay Direct	Approved
Generally under $25K a month	Process Now	Approved
5 recovery templates	EPD Commerce	Pending (do not use)
15 notification triggers	EPD Commerce	Pending (do not use)
43 user permissions	EPD Commerce	Pending (do not use)
7 user roles	EPD Commerce	Pending (do not use)
$12B+ processed	Easy Pay Direct	Retired (do not use)
12+ years	Easy Pay Direct	Retired (do not use)
18 years	Easy Pay Direct	Retired (do not use)
10+ years / more than a decade	Easy Pay Direct	Retired (do not use)

SECTION 02

Logo system.

The diamond mark and the italic COMMERCE wordmark, and how to use them.

LOGO SYSTEM

The primary lockup.

The horizontal lockup is the default. Diamond mark with white "EPD" inside, italic "COMMERCE" wordmark to the right. Use this everywhere unless space forces the stacked version.

On dark: epdc-horizontal.svg / epdc-horizontal-white.png

On light: epdc-horizontal-navy.svg / epdc-horizontal-navy-on-light.png

Writing the name

- Always write EPD Commerce. Never "EPD commerce", never "Epd Commerce", never "EPDC" in customer-facing copy.
- In body copy, spell it out on first mention. In tight UI or metadata, "EPDC" is acceptable.
- Never split the two words across a line break in headlines.
- Never use the diamond mark in place of the word "EPD" inline in body copy.

LOGO SYSTEM

Every logo file.

epdc-mark-on-dark.svg

epdc-mark-on-light.svg

epdc-stacked.png

epdc-horizontal-on-navy.png (solid tile)

process-now-white.png

easy-pay-direct-white.png

The diamond mark alone is for avatars, favicons, app icons, and small corner placements. Never use it inline in a sentence in place of "EPD."

Process Now and Easy Pay Direct logos appear only in content that explains the two processing options. They never replace the EPD Commerce logo.

FILE	USE	BACKGROUNDS
assets/logos/epdc-horizontal-white.png	Primary lockup on dark. Transparent background.	Dark gradient, navy, dark photos
assets/logos/epdc-horizontal-navy-on-light.png	Primary lockup on light	White, pale, tint
assets/logos/epdc-horizontal-navy.svg	Primary lockup on light, vector. Use for print and large sizes.	White, pale, tint
assets/logos/epdc-horizontal-on-navy.png	Lockup on a solid navy tile (not transparent)	Use only where a solid tile is wanted
assets/logos/epdc-horizontal.svg	Primary lockup on dark, vector. Use for print and large sizes.	Dark
assets/logos/epdc-stacked.png	Square and narrow vertical spaces	Light
assets/logos/epdc-mark-on-dark.svg	Standalone diamond mark: white diamond, navy EPD	Dark
assets/logos/epdc-mark-on-light.svg	Standalone diamond mark: navy diamond, white EPD	Light
assets/logos/process-now-white.png	Process Now logo, white	Dark only
assets/logos/easy-pay-direct-white.png	Easy Pay Direct logo, white	Dark only

LOGO SYSTEM

Clearspace and misuse.

X = the height of the diamond mark.

- **Clearspace**: keep an area equal to the height of the diamond mark on all four sides of the lockup. Nothing (headlines, logos, imagery, edges) enters that zone.
- **Minimum size for the horizontal lockup**: 120px wide on screen, 1 inch wide in print. Below this, use the mark alone.
- **Minimum size for the mark alone**: 24px on screen, 0.25 inch in print.
- Never letterspace the wordmark.
- Never stretch, squash, or rotate the diamond.

What not to do

Common misuses. Any of these voids the brand. If a partner or vendor produces work with any of these problems, ask them to redo it.

- **Do not recolor.** The diamond is navy on light or white on dark. Never other colors, never gradients.
- **Do not stretch or distort.** Width and height scale together.
- **Do not add effects.** No glow, no shadow, no bevel, no stroke, no outline. The logo is a solid shape, even where cards around it use shadows.
- **Do not rotate or tilt.** The diamond sits upright as a rotated square. Never rotate further.
- **Do not place on busy imagery.** If a photo or pattern makes the logo unreadable, place the logo on a solid navy or white bar over the imagery.
- **Do not swap the wordmark font.** COMMERCE is a specific italic slab treatment. Never replace with a generic italic or bold sans.
- **Do not separate the mark from the wordmark.** In the horizontal lockup, the diamond and COMMERCE always travel together at the same spacing.
- **Do not use low-resolution raster.** For anything above 200px wide, use the SVG.

SECTION 03

Capabilities.

Four names, always with their promise. CART is the default order.

CAPABILITIES

Create, Analyze, React, Transact.

EPD Commerce uses four capability names. The default order is **CART: Create, Analyze, React, Transact.** The order can change to fit the content, for example Transact first in payments-led content.

01

Create

Products, subscriptions, and AI-optimized pages

02

Analyze

Chat with your data. Let The Professor take action.

03

React

Protect the revenue you already earned

04

Transact

Payments first: the right merchant account and the ways buyers want to pay

Rules

- **Never use a capability name alone.** Each name must appear with its one-line promise and supporting copy. A bare "ANALYZE" eyebrow with no explanation is not allowed.
- **Order is flexible.** CART (Create, Analyze, React, Transact) is the default. Reorder when the content calls for it.
- **Always capitalized.** Never renamed, translated, or turned into verbs for other products.
- **Not in blog header images.** Capability names do not appear in blog header graphics. They confuse readers without the supporting copy.
- **Not a pillar.** The word "pillar" is retired. Say "capability" in internal docs. In customer copy, usually no category word is needed.

SECTION 04

Processing options.

EPD Commerce gives businesses two ways to process payments. Both run inside the same EPD Commerce account.

PROCESSING OPTIONS

Same platform. Same dashboard. Same catalog.

	PROCESS NOW	EASY PAY DIRECT
What it is	Auto-boarding for low-risk, lower-volume businesses that want to start quickly	A fully underwritten merchant account with a dedicated point of contact, set up for long-term processing
Best for	New businesses and low-risk verticals, generally under $25K a month	Established, higher-volume, regulated, or higher-risk businesses, and anyone who wants white-glove setup
Approval timing	Often same day	Typically 1 to 3 days, depending on how quickly documents arrive
Underwriting	Automated	Full underwriting with a dedicated risk and compliance team
Routing	Single account	Multi-processor routing with backup account failover

Process Now is not suited to high-volume, high-risk, regulated, or restricted businesses. Those businesses belong on Easy Pay Direct.

Timing and fit language

- Process Now: approval is **often** same day. The longer form "same day, **often** within an hour" is also approved.
- Easy Pay Direct: approval **typically** takes 1 to 3 days.
- Process Now fits businesses **generally** under $25K a month. It is a recommendation, not a cutoff. Easy Pay Direct does not require $25K a month.

Processing options vs payment methods

These are different things. Never mix them up.

- A **processing option** (or **processing rail**, EPD Commerce only) is the account behind the payments: Process Now or Easy Pay Direct.
- A **payment method** is what the buyer pays with.

Buyers can pay with cards, Apple Pay, Google Pay, PayPal, Venmo, ACH, and buy now, pay later (Splitit, Klarna, Afterpay, Sezzle) on either option.

Real marks from assets/payment-methods/. Never redraw them.

PROCESSING OPTIONS

How to talk about them.

Moving between options

A business can start on Process Now and move to Easy Pay Direct as volume, risk profile, or routing needs grow. Products, customers, subscriptions, and reporting stay where they are. Approved line: "Change rails without changing how you operate."

Partners, one link for both options

Partners share one EPD Commerce partner link. They do not need to decide which option a business needs. The EPD Commerce team reviews each application and talks with the business about which option fits.

Partner copy should say:

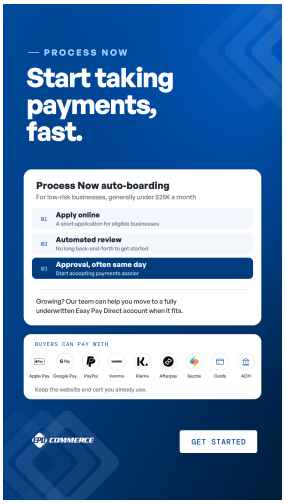

- "One link. We'll help each business find the right processing option."

Partner copy should never say:

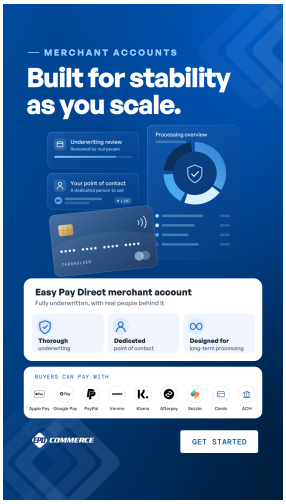

- That a business is guaranteed Process Now or same-day approval.
- That the partner decides which option a business gets.

Naming

- The auto-boarding option is named **Process Now**. Descriptions like "near-instant approval rail" are also fine on their own.
- When naming or comparing the options, call the underwritten option **Easy Pay Direct**.
- "Merchant accounts" is fine as a contextual eyebrow or label on social graphics (see `assets/examples/story-easy-pay-direct.png`), as long as the graphic names Easy Pay Direct elsewhere.
- Never mention banking partners by name. Say "one of our banking partners" if needed.

story-process-now.png

story-easy-pay-direct.png

Approved examples. Each names its option and uses the real logo.

SECTION 05

Color and buttons.

Navy, white, and blue. Values measured from the live epd.com site.

COLOR

A white page with navy panels.

Page and surfaces

Page `#FFFFFF`
The page itself is always white

Pale `#EBEDF6`
Light section or card fill

Tint `#F5F7FC`
Subtle card interiors

Border `#E2E8F0`
Card edges, table rules

Dark sections

Dark sections are **rounded panels on the white page**, not full-bleed bands that fade into white.

Left: dark section panel with optional highlight. Right: social gradient, assets/backgrounds/social-gradient-landscape.png.

- Never fade a dark section to white. The old `#003C7E → #6A9BD1 → #FFFFFF` hero gradient is retired.
- The highlight is optional and sits behind imagery or diagrams, never behind body text.
- For graphics, use the ready-made files in `assets/backgrounds/`.

COLOR

Gradient tokens and text.

Dark section tokens

TOKEN	VALUE
Dark gradient	`linear-gradient(100deg, #002B55 0%, #001D3B 55%, #000E20 100%)`
Optional highlight	`radial-gradient(60% 80% at 78% 45%, rgba(40,120,220,.28), transparent 70%)` layered on top
Panel radius	20px
Panel inset	24 to 34px from the page edge on desktop

Social gradient tokens

TOKEN	VALUE
Social gradient	`linear-gradient(135deg, #004A9C 0%, #003C7E 45%, #001D3B 100%)` (top left to bottom right)
Glow	`radial-gradient(circle at 90% 5%, rgba(0,104,222,.75), rgba(0,87,194,0) 75%)` layered on top
Files	`assets/backgrounds/social-gradient-{story,portrait,square,landscape}.png`

White cards (#FFFFFF, 32px radius at story size) can sit on the social gradient to hold detailed content.

Text colors

ROLE	ON LIGHT	ON DARK
Headline	#000000 to #0E1422	#FFFFFF
Headline accent (second line)	#0056BB	#8DCAFF
Body	#4A5878	#D1D8E7
Strong body	#0E1422	#EBEDF6
Eyebrow	#0056BB	#87C5FF
Muted	#64748B	#8FA0BF

COLOR

Blues and semantic colors.

Blues

Button blue
#00499A
Primary button fill on light, primary button text on dark, secondary button outline on light

Link blue
#0056BB
Text links, eyebrows, link CTAs

Link hover / brand navy
#003C7E
Hover state for links

Sky accent
#8DCAFF / #87C5FF
Headline accents and eyebrows on dark only

Semantic colors (in-product and diagrams only)

ROLE	HEX	USE
Status green	#3DDC73	"Ready," "live," and success dots in product UI and diagrams
Up delta	#0E9F5A	Positive change in charts
Error	#B91C1C	Errors

Green never appears as a general marketing accent.

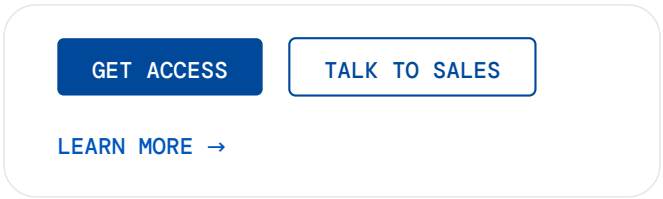

Retired

- Capability accent colors (purple #7C3AED, orange #EA580C, emerald #0E9F5A as a capability color). Do not use in marketing or partner graphics.
- #006EE8 as the CTA color. Use #00499A.
- #D1D8E7 as primary button text. Primary buttons use white text on light and #00499A text on dark.

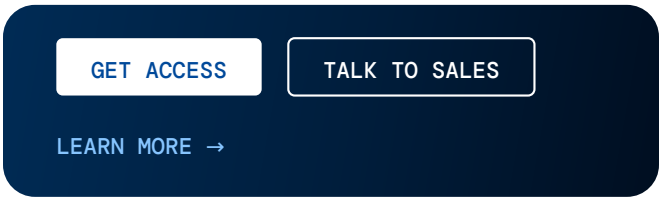

BUTTONS

Buttons and shadows.

All buttons use DM Mono 500, uppercase, 14px, 0.42px letter-spacing, and a 4px radius.

On light

On dark

Example labels only. Use the approved labels in each template.

BUTTON	ON LIGHT	ON DARK
Primary	#00499A fill, white text	White fill, #00499A text
Secondary	Transparent, 1px #00499A outline, #00499A text	Transparent, 1px white outline, white text
Text link CTA	#0056BB text, hover #003C7E, with →	#87C5FF text, with →
Nav CTA	Not used	Outline style inside the dark nav pill ("GET ACCESS")

- One primary button per view. A secondary may sit next to it.
- No pill-shaped (fully rounded) buttons. No gradient fills.
- Known site inconsistency: the beta form submit uses #0056BB with an 8px radius. The standard is #00499A with 4px.

Shadows

Shadows are used selectively, not banned.

USE	VALUE
Elevated cards and diagrams on light	`0 24px 60px -24px rgba(0,30,80,.35), 0 6px 20px -10px rgba(0,30,80,.18)`
Small cards on light	`0 8px 24px -14px rgba(20,30,60,.18)`
Nav pill	Soft dark shadow under the pill

Never use shadows on text or logos. Never use glows, bevels, or colored outer glows.

SECTION 06

Typography.

General Sans for headlines and body. DM Mono for eyebrows, labels, and buttons.

TYPOGRAPHY

Two typefaces.

Two typefaces: **General Sans** for headlines and body, **DM Mono** for eyebrows, labels, and buttons. Sentence case everywhere except DM Mono text, which is uppercase.

Aa

General Sans

HEADLINES AND BODY

Aa

DM Mono

EYEBROWS, LABELS, BUTTONS

Fallbacks: General Sans → DM Sans, Inter, system-ui. DM Mono → JetBrains Mono, Menlo.

Rules

- Sentence case for headlines and body. DM Mono eyebrows, labels, and buttons are uppercase.
- No Title Case. No all-caps General Sans.
- One headline accent per layout at most (the second line in #8DCAFF on dark or #0056BB on light).
- No italics as decoration. No underlines except body hyperlinks.
- Tabular figures for stats and tables (`font-variant-numeric: tabular-nums`).
- Never letterspace General Sans positively.

TYPOGRAPHY

Website components.

Measured from the live epd.com site.

COMPONENT	FONT	SIZE / LINE HEIGHT	WEIGHT	TRACKING	COLOR
Hero headline	General Sans	38 / 1.12 (34 tablet, 30 mobile)	500	-0.025em	White on dark
Feature section headline (dark)	General Sans	60 / 0.98	540	-0.052em	White, second line `#8DCAFF`
Section headline (light)	General Sans	40 / 1.15	500	-1px	`#000000` to `#0E1422`
Card headline	General Sans	22 to 28 / 1.2	500	-0.01em	
Lede	General Sans	18 / 1.55	400	0	`#D1D8E7` on dark, `#4A5878` on light
Body	General Sans	16 / 1.6	400	0	Same as lede
Small body	General Sans	14 / 1.5	400	0	
Eyebrow	DM Mono	12 to 14 / 1.2	500	0.12em to 0.16em	`#0056BB` on light, `#87C5FF` on dark
Label / pill	DM Mono	11 to 12 / 1.2	500	0.08em	
Button	DM Mono	14 / 1	500	0.42px (0.03em)	See `04-color.md`
Text link CTA	DM Mono	14 / 1	500	0.06em	`#0056BB`, hover `#003C7E`

Eyebrows may start with a short 24px horizontal rule in the same color, as in the site's "THE FOUNDATION" eyebrow. Draw the rule as a line. Never type it as a dash character.

TYPOGRAPHY

Social and partner graphics.

Sizes are in px at the template's native size. Template-specific limits are in `templates/`.

ELEMENT	STORY 1080×1920	PORTRAIT 1080×1350	SQUARE 1080×1080	LANDSCAPE 1200×628
Headline (General Sans 500, -0.03em, lh 1.05)	96	84	76	56
Headline max lines	4	4	3	2
Subhead / body (General Sans 400, lh 1.35)	40	36	34	26
Body max lines	4	4	3	2
Eyebrow (DM Mono 500, 0.14em, uppercase)	28	26	24	18
CTA (DM Mono 500, 0.04em, uppercase)	30	28	26	20
Footnote (General Sans 400)	24	22	20	15
Minimum text size anywhere	24	22	20	15

SECTION 07

Voice and copy.

Grounded, plainspoken, specific. No em dashes. Ever.

VOICE AND COPY

How we sound.

Confident, plainspoken, grounded. Short declarative sentences. Talk to "you" and "your business." The product does things on your behalf. No hype, no hedging, no exclamation points.

Lead with payments

Most readers come to EPD Commerce to accept payments. Open with what they get, then explain the tools.

Contrast framing

Use sparingly and only where it fits the audience.

- Most platforms tell you a payment failed. EPD Commerce does something about it. (any audience)
- Most AI helps you write faster. EPD Commerce helps you run better. (AI-focused audiences only)

DO	DON'T
Use sentence case in headlines.	Use Title Case Headlines That Feel Corporate.
Name the feature, then say what it does: "Revenue Recovery retries failed subscription payments."	Open with abstract nouns: "A solution for your catalog."
Ground claims in specifics, using only approved claims from `data/claims.json`.	Lowercase feature names in body copy, or replace them with "our recovery system" or "our AI."
Keep the soft words in timing and fit claims: "often same day," "typically 1 to 3 days," "generally under $25K."	Use hype words: revolutionary, game-changing, supercharge.
Use commas, periods, or parentheses for pauses.	Use em dashes.
Write numbers as numerals: 13+, $25K, 1 to 3 days.	Say approval is guaranteed, or promise placement in AI assistants.
	Reuse numbers from demos, dashboards, or screenshots as claims.
	Name banking partners. Say "one of our banking partners."
	Say "AI runs your business." Say what a named feature does.

VOICE AND COPY

Names, exactly.

The single authoritative list of names for EPD Commerce.

USE	NEVER
EPD Commerce	EPD commerce, Epd Commerce, EPDC (in customer-facing copy), epd-commerce
Easy Pay Direct	EPD (as shorthand for Easy Pay Direct), EasyPay Direct, Easy Pay
Process Now	ProcessNow, Process-Now, the starter rail
Easy Pay Direct	the EPD rail, the pro rail, EPD (as shorthand)
The Professor	The Data Professor, Data Professor, the professor (mid-sentence), Professor (without 'The'), Merchant Data LLM, our AI, the chatbot, the copilot, the assistant
Revenue Recovery	revenue recovery (mid-sentence), payment recovery, dunning (as a name for Revenue Recovery)
Recovery Templates	recovery playbooks, recovery strategies (as the feature name)
Order Rescue	order rescue (mid-sentence), checkout recovery
Optimized AI Strategy	AI strategy, smart routing (for this toggle)
Retry & Communication Logic	retry settings (as the feature name)
Billing Notifications	billing emails (as the feature name)
Custom Fields	custom fields (mid-sentence), product attributes
AI Product Landing Pages	AI landing pages (as the feature name), AI-generated landing pages
Easy Charge	EasyCharge, easy charge

Approved terms

TERM	SCOPE	MEANING
processing rail	EPD Commerce only	The merchant account arrangement behind a merchant's payments. Process Now or Easy Pay Direct.
payment method	both brands	What the buyer uses at checkout: cards, Apple Pay, Google Pay, PayPal, Venmo, ACH, buy now, pay later.
agentic commerce	both brands	Shopping in which an AI agent acts on a person's behalf within the authority that person grants.
buy now, pay later	both brands	Installment payment methods at the cart.
EPD	umbrella	The team and ecosystem behind both EPD Commerce and Easy Pay Direct, for example 'the EPD ecosystem' or 'the EPD team'.

Never name banking partners. Say “one of our banking partners.”

SECTION 08

Features.

Feature names are proper nouns. Present tense only after a confirmed release.

FEATURES

How to talk about features.

1. **Feature names are proper nouns.** Capitalize them wherever they appear. "Revenue Recovery," not "revenue recovery." "The Professor," not "the professor."
2. **Use the exact canonical spelling** from `data/names.json`. Do not shorten, translate, or abbreviate. Use the names exactly as they appear in the platform UI.
3. **Do not invent capabilities.** Only describe what the feature file says the feature does.
4. **Attribute agentic behavior specifically.** "The Professor creates a subscription from a plain-English request." "Order Rescue recovers failed one-time orders." Not "our AI handles it."
5. **Do not rename features** to sound more marketing-friendly.
6. **Do not use a feature name as a verb.**
7. **Introduce a feature with what it does, not with its capability name.** The capability name is optional context and, if used, follows the rules in `03-capabilities.md`.

Release status

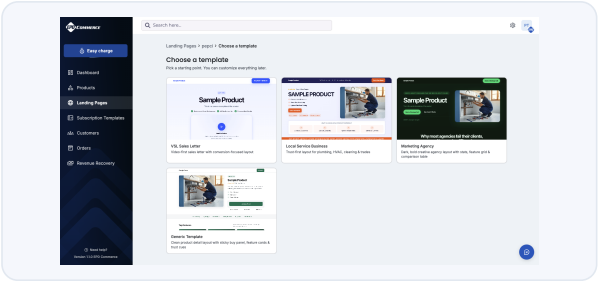

STATUS	MEANING	HOW TO WRITE ABOUT IT
`shipped`	Released and generally available	Present tense
`beta`	Released to some or all accounts as a beta	Present tense, always labeled "(beta)"
`in-development`	Being built, no confirmed release	Future tense, "coming soon," no dates
`planned`	On the roadmap	Do not mention publicly

Use present tense only after the release is confirmed. A target date or release window is not a confirmed release.

FEATURES

Approved feature copy.

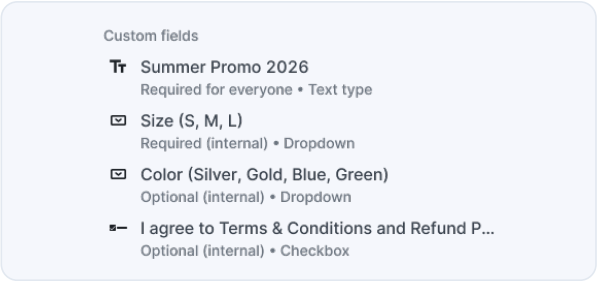

Shipped features with approved copy and screenshots in the repo. Use the one-liner as written.

CREATE / SHIPPED

AI Product Landing Pages

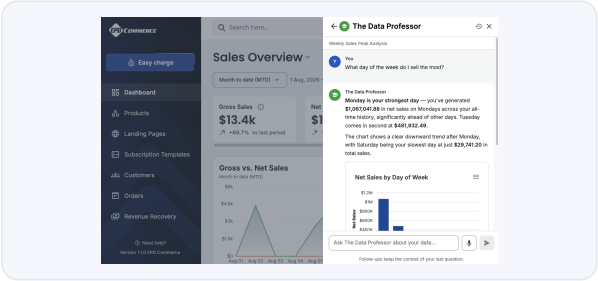

AI-optimized landing pages in one click, with schema markup, llms.txt, and structured data, so people and AI shopping tools can understand your catalog.

CREATE / SHIPPED

Custom Fields

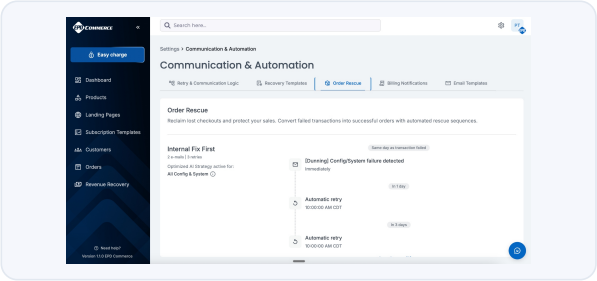

Add any data you need to any product. Custom Fields become part of the checkout, the order record, and the customer file.

ANALYZE / SHIPPED

The Professor

Chat with your data. Let The Professor take action. Ask in plain English, get answers grounded in your numbers, and have The Professor do the work.

REACT / SHIPPED

Revenue Recovery

Automatically retry failed payments and rescue at-risk revenue with rule-based strategies you preset or build yourself.

Screenshots from assets/epd-commerce-features/. Never generate synthetic screenshots, and never reuse demo numbers as claims.

SECTION 09

Making graphics.

Start from a template. Composite real files. Never redraw logos, marks, or UI.

MAKING GRAPHICS

Templates and the composite rule.

1. Start from a template in `templates/`. The template controls logo, type, colors, layout, and CTA.
2. Composite real files from `assets/`. Never generate or redraw logos, payment marks, diagrams, screenshots, or UI.
3. AI illustrations only inside a template's image area, in families that allow them, with no text, logos, or UI.
4. Use backgrounds from `assets/backgrounds/`. Dark sections never fade to white.
5. Check each asset's `partner_use` before using it in partner graphics.

Formats

FORMAT	SIZE	SAFE AREA
Story	1080 × 1920	96px sides, 250px top, 280px bottom (clear of platform UI)
Portrait (4:5 feed)	1080 × 1350	80px all sides. Uses story line counts at smaller type sizes.
Square	1080 × 1080	80px all sides
Landscape	1200 × 628	64px sides, 56px top and bottom. Text left, image right.

Backgrounds

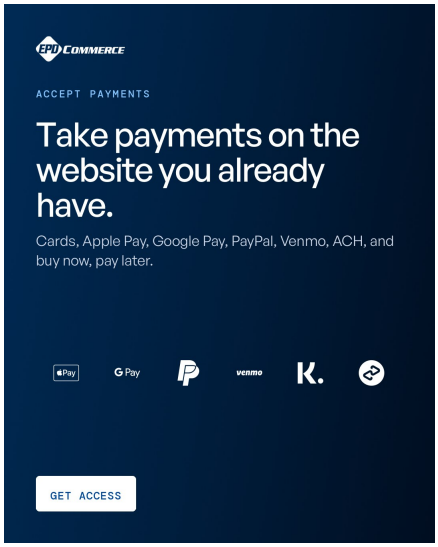

dark-gradient-square.png

dark-gradient-highlight-square.png

social-gradient-square.png

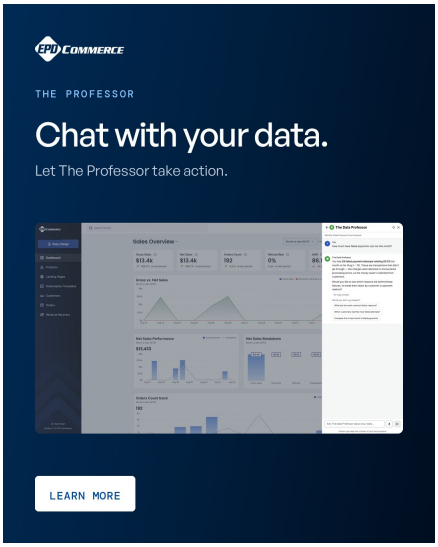

MAKING GRAPHICS

Five template families.

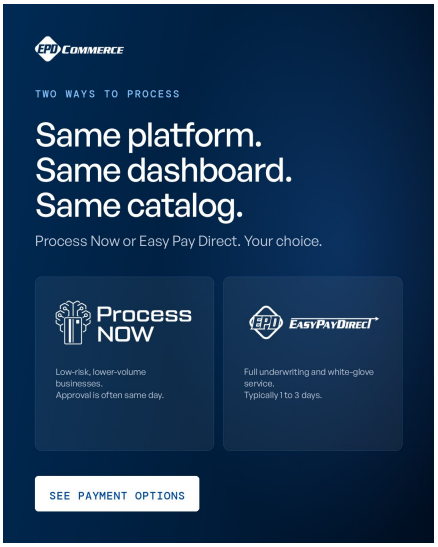

Payments benefit

Image area: Real payment-method marks. AI illustration: No.

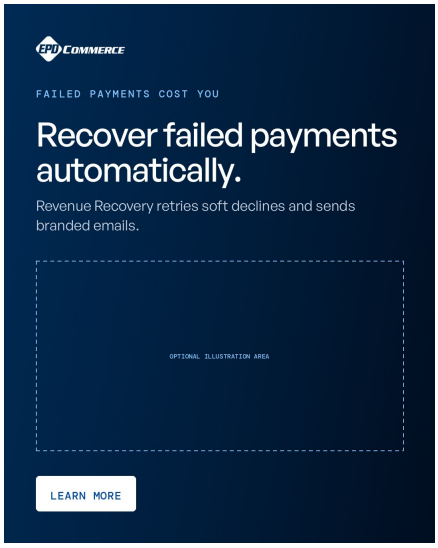

Product spotlight

Image area: Real product screenshot. AI illustration: No.

Two payment options

Image area: Process Now and Easy Pay Direct cards. AI illustration: No.

Problem and solution

Image area: Optional illustration. AI illustration: Yes.

Partner introduction

Image area: Optional illustration, co-branded logos. AI illustration: Yes.

Previews from templates/previews/ show example copy for review, not for publishing.

MAKING GRAPHICS

Who controls what.

The template controls: logo file and placement, fonts, type sizes, colors, background, layout, spacing, and CTA style.

AI may:

- Suggest eyebrow, headline, and body copy from approved facts only (`data/claims.json`, `data/names.json`, `messaging-kit/`).
- Adapt wording for the selected audience within each slot's `max_chars` and `max_lines`.
- Pick a CTA label from the template's `approved_labels`.
- Generate an optional illustration, only inside the image area of families that allow it.

AI may not: change the layout or styling, add unapproved numbers, draw or alter logos, payment-method marks, screenshots, or UI, use em dashes, or name banking partners.

Partner graphics

`agent-graphics/` is only for partners who arrive through the "Create with your own AI agent" prompt on epd.com. If that is how you were sent here, read `agent-graphics/README.md` next and follow it.

Its extra restrictions (read-only access, two template families, shipped features only, partner-approved assets only) apply only to that workflow. Staff and internal tools follow this file and are not limited by them.

EPD COMMERCE

QUESTIONS

When in doubt, check the repo.

This PDF is generated from the EPD Commerce brand repository. If anything here disagrees with the repo, the repo wins, and inside the repo the `data/` files win. Ask the marketing team before using anything that is not in the repo.
